

Cool Awesome Super Helpful Scheduler (CASH Scheduler)

Dynamo Timekeepers

Kevin Tran, Henry Fletcher, Alan Binion, Isaiah
Buluran

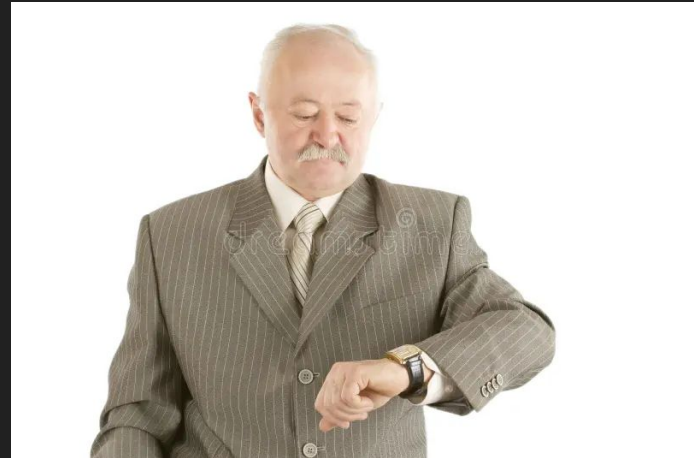

Description

Time is a precious resource and a need to organize it wisely has become a need for most working people. The CASH Scheduler is a simplistic scheduler that helps users organize their time and reminds them of any upcoming appointments.

What is it, what's it do?

Scheduler with very helpful features:

- Give reminders that will take into account how much time you need to get ready and travel to destinations
- Allows user to set alarms to remind them before an appointment time

What else does it do?

If it notices a repeated event it will ask to automatically set the event

Asks for permission on whether the feature would be activated or not.

Possible Future Development Paths

Use Google maps to calculate the time needed to arrive at a destination point and give the estimate to the user. Use that to adjust when reminders are given if needed.

Language + ide?

Language: C++

IDE: VS Code

What could this look like for a user?
